Facility and Base Operations Support Services

Vectrus gathers the right personnel, skills, tools, equipment, lean processes, and global resources to deliver innovative facility and base operations support services anytime, anywhere, and under any conditions. Count on us for mission success.
At Department of Defense, civilian, and intelligence community facilities throughout the world, Vectrus provides total infrastructure operations and maintenance services, including general facilities operations, construction, property control, sustainment and modernization, utilities operation and management, green initiatives, space management, supply services, and environmental, safety and health. We manage everything from modern, secure facilities for the intelligence community to World War II-era military structures to remote forward-operating locations in extreme environments.

**VECTRUS FACILITY AND BASE OPERATIONS SUPPORT SERVICES**

- **Facilities Operations and Maintenance.** Vectrus effectively maintains thousands of facilities worldwide and, notably, in some of the most austere environments.

- **Base Life Support.** We ensure the well-being of our military members and their families by providing food services; morale, welfare, and recreation services; postal operations; housing and lodging management; and travel office support at military installations around the globe.

- **Emergency Services.** We provide premier firefighting, ambulance, and medical services in locations such as Spain, Turkey, Kuwait, and Qatar.

- **Civil Engineering and Construction.** We provide comprehensive services, including facilities master planning, project design, and construction management, along with maintenance of historical sites and facilities.

- **Public Works.** Vectrus safely and reliably provides utility services, roads and grounds maintenance, environmental management and control, and land management worldwide, including in austere locations, such as Thule Air Base, Greenland.

- **Airfield Management.** We provide air traffic control, weather services, transient alert, aerospace ground equipment operations and maintenance, and airfield departure and arrival control group support both inside and outside the Continental United States.

- **Physical Security.** We protect the force by providing static and mobile security, entry and exit control points, biometric screening, interviewing, security badges, and personal security detachments.
