Vectrus regularly provides a wide range of supply chain and logistics services to enable the success of critical Department of Defense missions in the harshest environmental conditions.
Vectrus provides operational capabilities, facilitates velocity, enables military readiness, and produces quality services, while assisting in preserving and protecting the well-being of the force. We are a trusted DoD partner, and we remain true to your mission now and always.

**VECTRUS SUPPLY CHAIN AND LOGISTICS SERVICES**

- **Supply Chain Management.** Through our mature processes and hands-on management, Vectrus supply chain professionals provide the DoD with the highest-quality material support at the right place and time.

- **Maintenance.** Our teams enable readiness through equipment maintenance, including wheeled vehicles, tracked vehicles, and weapons at critical military installations around the globe.

- **Transportation and Distribution.** We facilitate velocity of the force by providing movement control, intermodal operations, and container management.

- **Supply.** We provide the warfighter with the materiel they need to accomplish the mission, whether that’s rations, ammunition, uniforms, medical supplies, or repair parts.

- **Field Services.** We maintain the force by providing for basic needs, such as shower and laundry, food service, and clothing and light textile repair.

- **Health Services Support.** We, and our teammates, protect the force everyday through a broad range of medical and preventive medicine operations.

- **Personnel Services.** We maintain the well-being of the force by providing human resources and community support; morale, welfare, and recreation support; and postal operations.
