- Supply chain and logistics services
- Information technology mission support
- Engineering and digital integration
- Strategic programs support
- Smart energy management, security, and resilience

**VECTRUS SMART ENERGY MANAGEMENT AND RESILIENCE SOLUTIONS**

The Department of Defense’s goal is to conduct modernized, resilient operations more effectively, with less dependence on logistics and manual labor costs. To further this goal, and meet the needs of today’s bases, Vectrus has partnered with commercial companies to expand base and installation operations for energy, building, troop, and operational cyber needs. We leverage technology to bring key solutions for cost and energy savings to optimize resources and support a backup or enhanced resiliency position for these assets.

We are transforming current mission operations into smart, integrated bases that reduce cost, improve threat visibility, and drive smarter, faster decisions through the following solutions:

- Products and automation
- Energy, ESCO, and ecosystem
- Engineering and digital integration
- Turnkey integrated electronic security systems
- ‘Zero trust’ communications architecture
GLOBAL REACH

WITH MORE THAN 70 YEARS OF EXPERIENCE,
 Vectrus operates globally in a wide range of conditions from modern, technologically advanced areas to austere contingency-based locations. Vectrus’ primary geographic areas of operation include Africa, Asia, Europe, Hawaii, the Middle East, and the United States.
